Franklin D. Roosevelt: Message to Congress on Exchanging Destroyers for British Naval and Air Bases.

To the Congress:

I transmit herewith for the information of the Congress notes exchanged between the British Ambassador at Washington and the Secretary of State on September 2, 1940, under which this Government has acquired the right to lease naval and air bases in Newfoundland, and in the islands of Bermuda, the Bahamas, Jamaica, St. Lucia, Trinidad, and Antigua, and in British Guiana; also a copy of an opinion of the Attorney General dated August 27, 1940, regarding my authority to consummate this arrangement.

The right to bases in Newfoundland and Bermuda are gifts-generously given and gladly received. The other bases mentioned have been acquired in exchange for 50 of our overage destroyers.

This is not inconsistent in any sense with our status of peace. Still less is it a threat against any nation. It is an epochal and far-reaching act of preparation for continental defense in the face of grave danger.

Preparation for defense is an inalienable prerogative of a sovereign state. Under present circumstances this exercise of sovereign right is essential to the maintenance of our peace and safety. This is the most important action in the reinforcement of our national defense that has been taken since the Louisiana Purchase. Then as now, considerations of safety from overseas attack were fundamental.

The value to the Western Hemisphere of these outposts of security is beyond calculation. Their need has long been recognized by our country, and especially by those primarily charged with the duty of charting and organizing our own naval and military defense. They are essential to the protection of the Panama Canal, Central America, the northern portion of South America, the Antilles, Canada, Mexico, and our own eastern and Gulf seaboards. Their consequent importance in hemispheric defense is obvious. For these reasons I have taken advantage of the present opportunity to acquire them.

BRITISH EMBASSY, Washington, D.C., September 2, 1940.

The Honourable Cordell Hull, Secretary of State of the United States, Washington, D.C.

SIR:

I have the honour under instructions from His Majesty's Principal Secretary of State for Foreign Affairs to inform you that in view of the friendly and sympathetic interest of His Majesty's Government in the United Kingdom in the national security of the United States and their desire to strengthen the ability of the United States to cooperate effectively with the other nations of the Americas in the defence of the Western Hemisphere, His Majesty's Government will secure the grant to the Government of the United States, freely and without consideration, of the lease for immediate establishment and use of naval and air bases and facilities for entrance thereto and the operation and protection thereof, on the Avalon Peninsula and on the southern coast of Newfoundland, and on the east coast and on the Great Bay of Bermuda.

Furthermore, in view of the above and in view of the desire of the United States to acquire additional air and naval bases in the Caribbean and in British Guiana, and without endeavouring to place a monetary or commercial value upon the many tangible and intangible rights and properties involved, His Majesty's Government will make

available to the United States for immediate establishment and use naval and air bases and facilities for entrance thereto and the operation and protection thereof, on the eastern side of the Bahamas, the southern coast of Jamaica, the western coast of St. Lucia, the west coast of Trinidad in the Gulf of Paria, in the island of Antigua and in British Guiana within fifty miles of Georgetown, in exchange for naval and military equipment and material which the United States Government will transfer to His Majesty's Government.

All the bases and facilities referred to in the preceding paragraphs will be leased to the United States for a period of ninety-nine years, free from all rent and charges other than such compensation to be mutually agreed on to be paid by the United States in order to compensate the owners of private property for loss by expropriation or damage arising out of the establishment of the bases and facilities in question.

His Majesty's Government, in the leases to be agreed upon, will grant to the United States for the period of the leases all the rights, power, and authority within the bases leased, and within the limits of the territorial waters and air spaces adjacent to or in the vicinity of such bases, necessary to provide access to and defence of such bases, and appropriate provisions for their control.

Without prejudice to the above-mentioned rights of the United States authorities and their jurisdiction within the leased areas, the adjustment and reconciliation between the jurisdiction of the authorities of the United States within these areas and the jurisdiction of the authorities of the territories in which these areas are situated, shall be determined by common agreement.

The exact location and bounds of the aforesaid bases, the necessary seaward, coast and antiaircraft defences, the location of sufficient military garrisons, stores, and other necessary auxiliary facilities shall be determined by common agreement.

His Majesty's Government are prepared to designate immediately experts to meet with experts of the United States for these purposes. Should these experts be unable to agree in any particular situation, except in the case of Newfoundland and Bermuda, the matter shall be settled by the Secretary of State of the United States and His Majesty's Secretary of State for Foreign Affairs. I have the honour to be, with the highest consideration, Sir, Your most obedient, humble servant, (Sgd.) LOTHIAN.

DEPARTMENT OF STATE,

Washington, September 2, 1940.

HIS EXCELLENCY THE RIGHT HONORABLE THE MARQUESS OF LOTHIAN, C. H., British Ambassador. EXCELLENCY: I have received your note of September 2, 1940.

I am directed by the President to reply to your note as follows: The Government of the United States appreciates the declarations and the generous action of His Majesty's Government as contained in your communication which are destined to enhance the national security of the United States and greatly to strengthen its ability to cooperate effectively with the other nations of the Americas in the defense of the Western Hemisphere. It therefore gladly accepts the proposals.

The Government of the United States will immediately designate experts to meet with experts designated by His Majesty's Government to determine upon the exact location of the naval and air bases mentioned in your communication under acknowledgment.

One of these is the power of the **Commander in Chief** of the Army and Navy of the United States, which is conferred upon the President by the Constitution but is not defined or limited. Happily, there has been little occasion in our history for the interpretation of the powers of the President as **Commander in Chief** of the Army and Navy. I do not find it necessary to rest upon that power alone to sustain the present proposal. But it will hardly be open to controversy that the vesting of such a function in the President also places upon him a responsibility to use all constitutional authority which he may possess to provide adequate bases and stations for the utilization of the naval and air weapons of the United States at their highest efficiency in our defense. It seems equally beyond doubt that present world conditions forbid him to risk any delay that is constitutionally avoidable.

The second power to be considered is that control of foreign relations which the Constitution vests in the President as a part of the Executive function. The nature and extent of this power has recently been explicitly and authoritatively defined by Mr. Justice Sutherland, writing for the Supreme Court. In 1936, in United States v. Curtiss-Wright Export Corp., et al. (299 U.S. 304), he said:

> It is important to bear in mind that we are here dealing not alone with an authority vested in the President by an exertion of legislative power, but with such an authority plus the very delicate, plenary, and exclusive power of the President as the sole organ of the Federal Government in the field of international relations—a power which does not require as a basis for its exercise an act of Congress, but which, of course, like every other governmental power, much be exercised in subordination to the applicable provisions of the Constitution. It is quite apparent that if, in the maintenance of our international relations, embarrassment—perhaps serious embarrassment—is to be avoided and success for our aims achieved, congressional legislation which is to be made effective through negotiation and inquiry within the international field must often accord to the President a degree of discretion and freedom from statutory restriction which would not be admissible were domestic affairs alone involved. Moreover, he, not Congress, has the better opportunity of knowing the conditions which prevail in foreign countries, and especially is this true in time of war. He has his confidential sources of information. He has his agents in the form of diplomatic, consular, and other officials. Secrecy in respect of information gathered by them may be highly necessary, and the premature disclosure of it productive of harmful results.

The President’s power over foreign relations while “delicate, plenary, and exclusive” is not unlimited. Some negotiations involve commitments as to the future which would carry an obligation to exercise powers vested in the Congress. Such Presidential arrangements are customarily submitted for ratification by a two-thirds vote of the Senate before the future legislative power of the country is committed. However, the acquisitions which you are proposing to accept are without express or implied promises on the part of the United States to be performed in the future. The consideration, which we later discuss, is completed upon transfer of the specified items. The Executive agreement obtains an opportunity to establish naval and air bases for the protection of our coast line but it imposes no obligation upon the Congress to appropriate money to improve the opportunity. It is not necessary for the Senate to ratify an opportunity that entails no obligation.

There are precedents which might be cited, but not all strictly pertinent. The proposition falls far short in magnitude of the acquisition by President Jefferson of the Louisiana Territory from a belligerent during a European war, the Congress later appropriating the consideration and the Senate later ratifying a treaty embodying the agreement.

I am also reminded that in 1850, Secretary of State Daniel Webster acquired Horse Shoe Reef, at the entrance of the President.
Buffalo Harbor, upon condition that the United States would engage to erect a lighthouse and maintain a light but would erect no fortification thereon. This was done without awaiting legislative authority. Subsequently, the Congress made appropriations for the lighthouse, which was erected in 1856. Malloy, Treaties and Conventions (vol. 1, p. 663).

It is not believed, however, that it is necessary here to rely exclusively upon your constitutional power. As pointed out hereinafter (in discussing the second question), I think there is also ample statutory authority to support the acquisition of these bases, and the precedents perhaps most nearly in point are the numerous acquisitions of rights in foreign countries for sites of diplomatic and consular establishments—perhaps also the trade agreements recently negotiated under statutory authority and the acquisition in 1903 of the coaling and naval stations and rights in Cuba under the act of March 2, 1901 (h. 803, 31 Stat. 895, 898). In the last-mentioned case the agreement was subsequently embodied in a treaty but it was only one of a number of undertakings, some clearly of a nature to be dealt with ordinarily by treaty, and the statute had required "that by way of further assurance the Government of Cuba will embody the foregoing provisions in a permanent treaty with the United States."

The transaction now proposed represents only an exchange with no statutory requirement for the embodiment thereof in any treaty and involving no promises or undertakings by the United States that might raise the question of the propriety of incorporation in a treaty. I therefore advise that acquisition by Executive agreement of the rights proposed to be conveyed to the United States by Great Britain will not require ratification by the Senate.

The right of the President to dispose of vessels of the Navy and unneeded naval material finds clear recognition in at least two enactments of the Congress and a decision of the Supreme Court—and any who assert that the authority does not exist must assume the burden of establishing that both the Congress and the Supreme Court meant something less than the clear import of seemingly plain language.

By section 5 of the act of March 3, 1883 (c. 141, 22 Stat. 582, 599600 (U.S. C., title 34, sec. 492)), the Congress placed restrictions upon the methods to be followed by the Secretary of the Navy in disposing of naval vessels, which have been found unfit for further use and stricken from the naval registry, but by the last clause of the section recognized and confirmed such a right in the President free from such limitations. It provides:

But no vessel of the Navy shall hereafter be sold in any other manner than herein provided, or for less than such appraised value, unless the President of the United States shall otherwise direct in writing. [Italics supplied.]

In Levinson v. United States (258 U.S. 198, 201), the Supreme Court said of this statute that "the power of the President to direct a departure from the statute is not confined to a sale for less than the appraised value but extends to the manner of the sale," and that "the word 'unless' qualifies both the requirements of the concluding clause."

So far as concerns this statute, in my opinion it leaves the President as Commander-in-Chief of the Navy free to make such disposition of naval vessels as he finds necessary in the public interest, and I find nothing that would indicate that the Congress has tried to limit the President's plenary powers to vessels already stricken from the naval registry. The President, of course, would exercise his powers only under the high sense of responsibility which follows his rank as Commander-in-Chief of his Nation's defense forces.

Furthermore, I find in no other statute or in the decisions any attempted limitations upon the plenary powers of the President as Commander-in-Chief of the Army and Navy and as the head of the state in its relations with foreign countries to enter into the proposed arrangements for the transfer to the British Government of certain over age destroyers and obsolescent military material except the limitations recently imposed by section 14 (a) of
the act of June 28, 1940 (Public, No. 671). This section, it will be noted, clearly recognizes the authority to make transfers and seeks only to impose certain restrictions thereon. The section reads as follows:

Sec. 14. (a) Notwithstanding the provision of any other law, no military or naval weapon, ship, boat, aircraft, munitions, supplies, or equipment, to which the United States has title, in whole or in part, or which have been contracted for, shall hereafter be transferred, exchanged, sold, or otherwise disposed of in any manner whatsoever unless the Chief of Naval Operations in the case of naval material, and the Chief of Staff of the Army in the case of military material, shall first certify that such material is not essential to the defense of the United States.

Thus to prohibit action by the constitutionally created Commander-in-Chief except upon authorization of a statutory officer subordinate in rank is of questionable constitutionality. However, since the statute requires certification only of matters as to which you would wish, irrespective of the statute, to be satisfied, and as the legislative history of the section indicates that no arbitrary restriction is intended, it seems unnecessary to raise the question of constitutionality which such a provision would otherwise invite.

I am informed that the destroyers involved here are the survivors of a fleet of over 100 built at about the same time and under the same design. During the year 1930, 58 of these were decommissioned with a view toward scrapping and a corresponding number were recommissioned as replacements. Usable material and equipment from the 58 vessels removed from the service were transferred to the recommissioned vessels to recondition and modernize them, and other usable material and equipment were removed and the vessels stripped. They were then stricken from the Navy Register, and 50 of them were sold as scrap for prices ranging from $5,260 to $6,800 per vessel, and the remaining 8 were used for such purposes as target vessels, experimental construction tests, and temporary barracks. The surviving destroyers now under consideration have been reconditioned and are in service, but all of them are over age, most of them by several years.

In construing this statute in its application to such a situation it is important to note that this subsection as originally proposed in the Senate bill provided that the appropriate staff officer shall first certify that "such material is not essential to and cannot be used in the defense of the United States." Senator Barkley and others objected to the subsection as so worded on the ground that it would prevent the release and exchange of surplus or used planes and other supplies for sale to the British and that it would consequently nullify the provisions of the bill (see sec. 1 of the act of July 2, 1940, H. R. 9850, Public, No. 703) which the Senate had passed several days earlier for that very purpose. Although Senator Walsh stated that he did not think the proposed subsection had that effect, he agreed to strike out the words "and cannot be used." Senator Barkley observed that he thought the modified language provided "a much more elastic term." Senator Walsh further stated that he would bear in mind in conference the views of Senator Barkley and others, and that he had "no desire or purpose to go beyond the present law, but to have some certificate filed as to whether the property is Surplus or not" (Congressional Record, June 21, 1940, pp. 13370-13371).

In view of this legislative history it is clear that the Congress did not intend to prevent the certification for transfer, exchange, sale, or disposition of property merely because it is still used or usable or of possible value for future use. The statute does not contemplate mere transactions in scrap, yet exchange or sale except as scrap would hardly be possible if confined to material whose usefulness is entirely gone. It need only be certified as not essential, and "essential," usually the equivalent of vital or indispensable, falls far short of "used" or "usable."

Moreover, as has been indicated, the congressional authorization is not merely of a sale, which might imply only a cash transaction. It also authorizes equipment to be "transferred," "exchanged," or "otherwise disposed of"; and in connection with material of this kind for which there is no open market value is never absolute but only relative—and chiefly related to what may be had in exchange or replacement.

In view of the character of the transactions contemplated, as well as the legislative history, the conclusion is inescapable that the Congress has not sought by section 14 (a) to impose an arbitrary limitation upon the judgment of the highest staff officers as to whether a transfer, exchange, or other disposition of specific items would impair our essential defenses. Specific items must be weighed in relation to our total defense position before and after an exchange or disposition. Any other construction would be a virtual prohibition of any sale, exchange, or disposition of material or supplies so long as they were capable of use, however ineffective, and such a prohibition obviously was not, and was not intended to be, written into the law.

It is my opinion that in proceeding under section 14 (a) appropriate staff officers may and should consider remaining useful life, strategic importance, obsolescence, and all other factors affecting defense value, not only with respect to what the Government of the United States gives up in any exchange or transfer, but also with respect to what the Government receives. In this situation good business sense is good legal sense.

I therefore advise that the appropriate staff officers may, and should, certify under section 14 (a) that ships and material involved in a sale or exchange are not essential to the defense of the United States if in their judgment the consummation of the transaction does not impair or weaken the total defense of the United States, and certainly so where the consummation of the arrangement will strengthen the total defensive position of the Nation.

With specific reference to the proposed agreement with the Government of Great Britain for the acquisition of naval and air bases, it is my opinion that the Chief of Naval Operations may, and should, certify under section 14 (a) that the destroyers involved are not essential to the defense of the United States if in his judgment the exchange of such destroyers for such naval and air bases will strengthen rather than impair the total defense of the United States.

I have previously indicated that in my opinion there is statutory authority for the acquisition of the naval and air bases in exchange for the vessels and material. The question was not more fully discussed at that point because dependent upon the statutes above treated and which required consideration in this section of the opinion. It is to be borne in mind that these statutes clearly recognize and deal with the authority to make dispositions by sale, transfer, exchange, or otherwise; that they do not impose any limitations concerning individuals, corporations, or governments to which such dispositions may be made; and that they do not specify or limit in any manner the consideration which may enter into an exchange. There is no reason whatever for holding that sales may not be made to or exchanges made with a foreign government or that in such a case a treaty is contemplated. This is emphasized when we consider that the transactions in some cases may be quite unimportant, perhaps only dispositions of scrap, and that a domestic buyer (unless restrained by some authorized contract or embargo) would be quite free to dispose of his purchase as he pleased. Furthermore, section 14 (a) of the act of June 28, 1940, supra, was enacted by the Congress in full contemplation of transfers for ultimate delivery to foreign belligerent nations. Possibly it may be said that the authority for exchange of naval vessels and material presupposes the acquisition of something of value to the Navy or, at least, to the national defense. Certainly I can imply no narrower limitation when the law is wholly silent in this respect. Assuming that there is, however, at least the limitation which I have mentioned, it is fully met in the acquisition of rights to maintain needed bases. And if, as I hold, the statute law authorizes the exchange of vessels and material for other vessels and material or, equally, for the right to establish bases, it is an inescapable corollary that the statute law also authorizes the acquisition of the ships or material or bases which form the consideration for the exchange.

Whether the statutes of the United States prevent the dispatch to Great Britain, a belligerent power, of the so-called “mosquito boats” now under construction or the overage destroyers depends upon the interpretation to be placed on section 3 of title V of the act of June 15, 1917 (c. 30, 40 Stat. 217, 222). This section reads:

During a war in which the United States is a neutral nation, it shall be unlawful to send out of the jurisdiction of the United States any vessel, built, armed, or equipped as a vessel of war, or converted from a private vessel into a vessel of war, with any intent or under any agreement or contract, written or oral, that such vessel shall be delivered to a belligerent nation, or to an agent, officer, or citizen of such nation, or with reasonable cause to believe that the said vessel shall or will be employed in the service of any such belligerent nation after its departure from the jurisdiction of the United States.

This section must be read in the light of section 2 of the same act and the rules of international law which the Congress states that it was its intention to implement (H. Rept. No. 30, 65th Cong., 1st sess., P. 9). So read, it is clear that it is inapplicable to vessels, like the overage destroyers, which were not built, armed, equipped as, or converted into, vessels of war with the intent that they should enter the service of a belligerent. If the section were not so construed, it would render meaningless section 2 of the act which authorizes the President to detain any armed vessel until he is satisfied that it will not engage in hostile operations before it reaches a neutral or belligerent port. The two sections are intelligible and reconcilable only if read in light of the traditional rules of international law. These are clearly stated by Oppenheim in his work on International Law (5th ed., vol. 2, sec. 334, pp. 574-576):

Whereas a neutral is in nowise obliged by his duty of impartiality to prevent his subjects from selling armed vessels to the belligerents, such armed vessels being merely contraband of war, a neutral is bound to employ the means at his disposal to prevent his subjects from building, fitting out, or arming, to the order of either belligerent, vessels intended to be used as men-of-war, and to prevent the departure from his jurisdiction of any vessel which, by order of either belligerent, has been adapted to warlike use. The difference between selling armed vessels to belligerents and building them to order is usually defined in the following way:

An armed ship, being contraband of war, is in nowise different from other kinds of contraband, provided that she is not manned in a neutral port, so that she can commit hostilities at once after having reached the open sea. A subject of a neutral who builds an armed ship, or arms a merchantman, not to the order of a belligerent, but intending to sell her to a belligerent, does not differ from a manufacturer of arms who intends to sell them to a belligerent. There is nothing to prevent a neutral from allowing his subjects to sell armed vessels, to deliver them to belligerents, either in a neutral port or in a belligerent port. . . .

On the other hand, if a subject of a neutral builds armed ships to the order of a belligerent, he prepares the means of naval operations, since the ships, on sailing outside the neutral territorial waters and taking in a crew and ammunition, can at once commit hostilities. Thus, through the carrying out of the order of the belligerent, the neutral territory has been made the base of naval operations; and as the duty of impartiality includes an obligation to prevent either belligerent from making neutral territory the base of military or naval operations, a neutral violates his neutrality by not preventing his subjects from carrying out an order of a belligerent for the building and fitting out of men-of-war. This distinction, although of course logically correct, is hairsplitting. But as, according to the present law, neutral States need not prevent their subjects from supplying arms and ammunition to belligerents, it will probably continue to be drawn. Viewed in the light of the above, I am of the opinion that this statute does prohibit the release and transfer to the British Government of the so-called mosquito boats now under construction for the United States Navy. If these boats were released to the British Government, it would be legally impossible for that Government to take them out of this country after their completion, since to the extent of such completion at least they would have been built, armed, or equipped with the intent, or with reasonable cause to believe, that they would enter the service of a belligerent after being sent out of the jurisdiction of the United States.

This will not be true, however, with respect to the overage destroyers, since they were clearly not built, armed, or equipped with any such intent or with reasonable cause to believe that they would ever enter the service of a
belligerent.

In this connection it has been noted that during the war between Russia and Japan in 1904 and 1905, the German Government permitted the sale to Russia of torpedo boats and also of ocean liners belonging to its auxiliary navy. See Wheaton's International Law, 6th ed. (Keith), vol. 2, p. 977.

Accordingly, you are respectfully advised:
(a) That the proposed arrangement may be concluded as an Executive agreement, effective without awaiting ratification.
(b) That there is Presidential power to transfer title and possession of the proposed considerations upon certification by appropriate staff officers.
(c) That the dispatch of the so-called "mosquito boats" would constitute a violation of the statute law of the United States, but with that exception there is no legal obstacle to the consummation of the transaction, in accordance, of course, with the applicable provisions of the Neutrality Act as to delivery. Respectfully submitted.
